Education:

Saint Petersburg State University of Economics

2010-2016, Economist (specialty)

Technology and hard skills:

- JavaScript
- React (Formik, hooks, React Router v6+, HOC, Standard Library)
- Redux, RTK Query
- Vue
- Python 3 (OOP, PEP8, Flake8, Unicorn, RegExp, Standard Library)
- Django 3 (Django admin, ORM, DTL, MVC, MVT, Bootstrap, CBV, FBV, Crispy forms, API)
- HTML5
- CSS
- SQL (MySQL, MSSQL)
- Git (GitHub)
- Docker, Docker Compose
- Celery, Redis
- Jira
- Heroku Platform (Publishing and setting up application)
- PyCharm (Setting up the IDE environment, connecting modules and plugins)
- Visual Studio Code (Connecting modules and plugins)
- Windows (CMD)

Soft skills:

English knowledge level: **A2/B1**

Incredible communication skills, learning ability, a high degree of responsibility, perseverance in solving tasks, clarity of thought, efficiency, and most importantly-the ability to quickly Google with the interpretation of results =)

Personal motivation:

While building a career as an economist, I realized that economics was a stable field, but there was a desire to tie my life to a progressive and interesting field. I believe that a career in IT is a never-ending development and economics will not give me the freedom that the world of development and IT gives me.

Development experience:

November 2022 – Present time

Little Knits Story, Frontend developer

Creating a website about knitting with React, ReduxToolKit, Bootstrap, GraphQL, adaptation for mobile and desktop devices.

September 2020 – October 2022

Various IT classes, and courses

Completed training

- JavaScript + React + Redux (Udemy)
- WEB-Developer (Udemy)
- Python Basics (Stepik)
- Python Advanced Course (Stepik)
- Object-oriented programming (Stepik)
- SQL (Stepik)
- Using GIT (Thinknetica, Udemy)
- Django Basics (Stepik)
- Advanced Django (Thinknetica)
- HTML / CSS Course (Udemy, Stepik)
- Using the Windows Command line

Achievements

I graduated from the courses with honors, participated in solving problems in the team, created and finalized my project on Django

The main achievement at the moment is the high assessment of teachers and diplomas with honors in the courses:

- JavaScript + React - from zero to the result
- WEB-Developer
- Python Basics
- Python Advanced Course
- Advanced Django Course

Completed projects:

- Website-portfolio - React, HTML, CSS, third-party libraries (<https://prudinskaya.com/>)
- Marvel Learning Project - Reaction, Hooks, HTML, CSS, third-party libraries (<https://github.com/BulochkaBU/marvel>)
- Training Project Hero Admin Panel - React, Redux, Bootstrap (https://github.com/BulochkaBU/hero_admin_panel_template)
- Training Project Employee Panel – React (https://github.com/BulochkaBU/employees_react)
- Pulse Training Project - HTML, CSS, Sass/Less (<https://github.com/BulochkaBU/pulse>)
- Uber Learning Project - HTML, CSS, Bootstrap, Sass/Less (https://github.com/BulochkaBU/Bootstrap_Uber)
- Job Training Project – Python, Django (https://github.com/BulochkaBU/Stepik_Vacancies_Django)

Shorty about me

I was born in the beautiful city of Pushkin, St. Petersburg, and my childhood was spent among palaces and museums, which instilled in me a sense of beauty. I like intellectual types of entertainment, so during my

school and university years I participated a lot in "What? Where? When?" and "Quizzes" tournaments, which certainly helped me broaden my horizons.

In my free time, I love the outdoors with my dog, biking, hiking and traveling.

I love reading, both fiction and professional and educational literature, my most recent read is "Grokai Alogrima" by Bhargava Aditya. I embroider and love painting by numbers, it's a way for me to relax and free my head for new knowledge. I like to set goals for myself and achieve them while keeping my life-work balance.

I believe that personal happiness does not require publicity, so I am reluctant to lead social networks and do not like to put up photos.

Life motto - everything is possible!
